

I'm not robot!

spares-2-go

Media Platforms Design Team On the days you just can't hand wash or spot clean another thing, remember that you have a major time-saving machine in your house. Lots of things, like these eight items, can be tossed in the washer. Just be sure to check any care tags or manufacturer guidelines first. 1. Stuffed animals If your son's favorite teddy bear looks like he's been mud wrestling, give him a bath in the washing machine on a gentle cycle. Secure any loose strings, remove any "clothing," and place the toy in a mesh bag or pillowcase for added protection. Don't forget to check the care tag (it he has one). Certain furs might not be washable, and the same goes for a toy stuffed with small foam balls, like Beanie Babies. 2. Sneakers Wash canvas or nylon tennies (like Keds — avoid putting leather or athletic shoes in the washing machine) in cold water to prevent any warping, and throw in an old towel to prevent them from knocking around too much in the machine. Remove the insoles and laces if you can, and wash those separately. 3. Pillows Good news: If your pillows are down or fiberfill, you can clean them in the washing machine. Use a gentle cycle with warm water, but always read the care label first. 4. Backpacks or lunch bags Although you might not think to check, some backpacks can be washed in a front-loading washing machine (and throw in your soccer star's stinky shin guards, too). Turn the bag inside out and remove metal parts, if you can, and know that any bejeweled elements or decals might not withstand the spinning. Place the bag in a pillowcase to protect it, and wash on a gentle cycle. RELATED: 8 Ingenious Laundry Room Ideas » 5. Rubber-backed rugs These no-skid mats get a lot of foot traffic, and can quickly become dirty instead of decorative. If your rug is made of cotton or synthetic fibers, you can throw it in the washing machine along with bath towels. Wash in cold water on the gentle cycle, and don't clean them too often: The rubber backing can't withstand weekly trips to the laundry room. 6. Curtains Save yourself the chore of hand washing as you refresh your windows. Unless your curtains are made of a delicate material, they can likely be washed on a slow-spin cycle in cool water. 7. Chair pads Bring your patio furniture out of hibernation. Wash one chair pad at a time, use the gentle cycle, and make sure your machine has enough space — if you're forcing the pads to fit inside (they may not fit if your machine has an agitator), to wash them by hand instead. 8. Car mats After months of carpooling, your mats need a thorough cleaning. Pretreat them with a stain remover, like Shout Advanced Gel, and wash them with your normal detergent. Frequently Asked QuestionsOur support team searches for useful product information and answers to frequently asked questions. If you find an inaccuracy in our frequently asked questions, please let us know by using our contact form. My washing machine won't drain, what can I do? Verified The main reason a washing machine won't drain is because of blockage in either the pump or the drain hose. If your washing machine has access to these parts, try to remove any blockage. If this does not solve the problem or if you don't have access to these parts you should contact a mechanic or the manufacturer. This was helpful (19007) My washing machine won't start when I press the start-button, what can I do? Verified In many cases the door of the washing machine hasn't closed properly. Open and close the door and try again. This was helpful (17973) There is no water coming into my washing machine, what can I do? Verified Check if the water inlet is open and if there aren't any kinks in the hose of the water inlet. If this doesn't solve the problem you should contact the manufacturer. This was helpful (7014) My washing machine makes a lot of noise and/or vibrates loudly, what can I do about that? Verified It's possible that the washing machine has not been leveled. You can do this by adjusting the feet to make it perfectly level. The problem can also be caused by inserting too much clothes in the machine. If these are not the cause of your problem you should contact the manufacturer. This was helpful (5108) The door of my washing machine won't open, what can I do? Verified There can be several causes. The most common cause is the filter being clogged. Unplug the appliance and check the filter. Remove any blockage if necessary. The location of the filter is different depending on the model. It is also possible that there is a special lever to open the door. If these options don't help, the last option is unplug the appliance for a period of 30-60 minutes and try to open the door after that. If this doesn't work, contact the manufacturer or a mechanic. This was helpful (5001) In which compartment should the detergent go? Verified Most washing machines have 3 compartments for detergent. These compartments are often marked with I, II and * to show where the detergent goes. Compartment I is used for a pre-wash cycle, II is for the main wash cycle and * is for fabric softener. Compartment II is used most often. This was helpful (2840) Can I connect my washing machine to a warm water outlet? Verified Although washing machines can probably handle water intake up to 65°C, this is not recommended by most manufacturers. There are wash cycles that specifically make use of cold water. In those cases warm water can harm the results of your wash cycle. Also, many washing machines are designed to be connected to a cold water outlet. This was helpful (2489) My washing machine smells, what can I do about it? Verified There are washing machines with self-cleaning features. If these features are not available it's possible to add 100ml of white vinegar or 100gr of soda crystals and have the washing machine run a 90 °C program. This was helpful (2303) What should I pay attention to when moving a washing machine? Verified When moving a washing machine, you should secure the drum. You can use the transit bolt which come with every washing machine and will prevent the drum from moving around inside the machine. You also need to drain all the water. This was helpful (1012) Can I stack my dryer and washing machine? Verified In general it is possible to directly stack a dryer and washing machine directly on top of each other. This only works with front loading models. However, it is advisable to use a fitting accessory to do so. This will prevent the machines from vibrating and falling off and also prevents damage to the bottom machine. This was helpful (807) What is the difference in usage between a washer-dryer and a separate washing machine and dryer? Verified The biggest advantage of a washer-dryer is that it takes less space. However, a separate dryer will be able to dry more than a washer-dryer. A washer-dryer also uses relatively more energy and requires more time. This was helpful (672) Can I connect a washing machine to an extension cord? Verified Appliances that require large amounts of power, like a washing machine, can not be connected to all extension cords. See what the power usage of the washing machine is, which is indicated in Watt, and check if the extension cord can handle this. There are extension cords with thicker cables that are made to handle larger appliances. This was helpful (670)
